

Tailwind CSS

HINDI / URDU

**From Basics
To Mastery** 🔥

INTRODUCTION

Tailwind CSS is a utility-first CSS framework that utilizes classes directly within HTML tags to style elements, rather than writing custom CSS. It provides a set of pre-defined utility classes that can be used to customize web pages rapidly.

WHY TAILWIND?

- **Efficiency**
- **Flexibility**
- **Scalability**
- **Performance**
- **Responsive Design**

IN THIS COURSE
